Plastic Plus®, mission is to meet our customers' needs for blown extrusion, injection, and extrusion processes, while adhering to their quality, service and price point requirements.

Our commitments

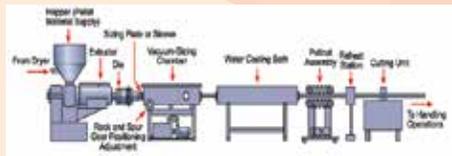

- > PRODUCT DEVELOPMENT**
Based on our customers' needs, we produce a proposal that includes design, diagrams, prototype, mold manufacture, and production.
- > CONFIDENTIALITY**
In accordance with its policies and values that prioritize honesty, Plastic Plus is committed to carrying out its customers' projects with integrity and in accordance with legal standards.
- > SURVEILLANCE**
Our customers receive an online password to our CCTV system that allows them to observe how we manufacture and handle their products.
- > UTMOST CARE**
We exercise utmost care with our tooling.
- > CONTINUOUS IMPROVEMENT**
We are committed to continuous improvement in each project.

PRODUCTION PROCESSES

EXTRUSIÓN

- > What is the capacity of the profile extrusion machines?
From ½ to 3 ½ inches, single and twin spindle.
- > Which materials do they process?
Rigid PVC, Flexible PVC, Polyethylene.
- > What dimension range can be extruded?
6 mm up to 140 mm

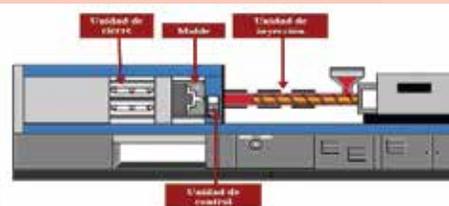

Product samples

INJECTION

- > What is the capacity of the injection machines?
Our machines have an injection capacity from 25 up to 320 tons.
- > Which materials do they process?
Polyethylene, PVC, ABS, Nylon, Polypropylene.
- > Do you produce molds?
No, but our domestic and international suppliers help us to develop them.

Product samples

BLOWN EXTRUSION

- > What is the capacity of the blow-molding machine?
From ½ liter to 1 gallon.
- > How many stations and heads does the blow-molding machine have?
It has two stations and two heads.
- > How many 1-liter bottles with two double molds could you deliver in one week?
That depends on the product cooling and weight. As a reference, it is possible to produce approximately 80,000 units of a liquid detergent bottle per week.
- > Can you make bottles with a peephole?
Yes, our machinery has a peephole.

Product samples

ASSEMBLY AND PACKAGING

- > Can you package injected products with our packaging and labeling specifications, etc.?
Yes, we have subassembly and packaging lines.
- > Can the products be delivered to a border point or shipping port?
Yes, it is possible.
- I do not have a mold, only an idea.
- > Can you develop diagrams and a cost of tooling and production?
We can develop turnkey projects, based on our customers' ideas. We generate the diagrams, prototypes, molds and manufacture, providing a comprehensive solution.
